

DYNAMITE LS
TALL FESCUE

EXPLOSIVE TILLERING CAPABILITY

- VERY AGGRESSIVE TILLERING
- DARK GREEN
- FINE LEAVED AND DENSE TURF
- TOP PERFORMER IN SOUTHEAST NTEP
- EXCELLENT WEAR TOLERANCE
- SLOW GROWING VARIETY

Dynamite LS was the top performer in the Southeast NTEP trial. It exhibits very aggressive tillering with lateral spread technology.

Dynamite LS also produces a very dark green, dense turf which makes for a very wear tolerant variety. **Dynamite LS** is a slow growing variety resulting in fewer mowings and reduced clippings.

Dynamite LS is an ideal choice for all your turf needs where a truly wear tolerant variety is needed.

NTEP DATA

VARIETY	TURF QUALITY MEAN	LEAF TEXTURE MEAN	SPRING DENSITY MEAN	RELATIVE GROWTH RATE*	NET BLOTCH TOLERANCE
DYNAMITE LS	6.0	6.3	6.5	1.7	6.3
GRANDE 3	6.2	6.0	6.3	2.7	3.0
FALCON IV	6.0	5.7	5.9	3.0	5.0
AQUADUCT	5.6	5.5	5.8	4.0	3.0
WARHAWK	5.4	6.4	5.8	2.7	4.3
FAITH	6.2	6.0	6.1	2.7	4.3
CATALYST	6.2	6.2	6.1	2.7	2.7
RAIN DANCE	5.9	5.7	6.0	3.3	2.7
LSD VALUE	0.2	0.3	0.6	1.4	1.3

AREAS OF USE

- PROFESSIONAL LAWN AND LANDSCAPE
- HOME LAWNS
- MUNICIPAL USE
- SPORTS FIELDS

TURF QUALITY - SE REGION

Dynamite LS exhibits excellent turf quality, even in the harsh summer conditions of the southeast region.

2013 NTEP Mean Turfgrass Quality Rating - Southeast Region

GENETIC COLOR

Dynamite LS has excellent genetic color. It is very dark green making it ideal for high quality turf needs.

2013 NTEP Mean Genetic Color Rating

SEEDING AND OVERSEEDING Tall fescue prefers warmer soil for germination, typically 55°F to 58°F. In the Transition zone this means early spring and early fall. Further north, late spring and late summer is preferred. Dynamite LS should be sown at a rate of 6 to 9 lbs per 1000 sq ft (275 to 400 lbs per acre), lightly covered with soil and kept moist until after the first cutting. Maximum density is achieved by planting with a slicer/seeder or following aeration, and with the application of a starter fertilizer. First mowings are generally within three weeks, or when plants first reach 3 in. in height. Overseed existing tall fescue at a rate of 225 to 300 lbs per acre.

MAINTENANCE Dynamite LS natural dark color, density and pest resistance minimize the need for extensive maintenance. Generally 2 to 3 pounds of nitrogen as part of a balanced fertilizer applied annually is all that's required. Cutting heights should range between 2 to 3 inches. Under controlled conditions heights down to 1 inch can be satisfactorily maintained.
